Full Stack Developer Intern

Remote

- Engineered a production-grade **RAG-based AI chatbot** integrating Gemini embeddings and Sanity CMS across 4 core domains, reducing unresolved user queries by **40%** via low-latency semantic vector retrieval.
- Architected an **AEO Knowledge Graph** featuring structured Q&A pages and JSON-LD FAQ schema markup spanning 200+ intent queries, securing citation visibility by major AI search engines (Perplexity, ChatGPT, Gemini).
- Built a high-throughput multilingual NLP pipeline (Hindi/English auto-detection) with 3-tier intent classification and automated WhatsApp handoff, cutting manual support intervention overhead by **20%**.

PROJECTS

SoulCare | [Express.js](#), [MongoDB](#), [Firebase](#), [RAG](#), [ChromaDB](#), [WebRTC](#) ([GitHub](#) · [Demo](#)) Nov 2025

- Designed and built a scalable mental health platform with Role-Based Access Control (RBAC) across 3 distinct user tiers, securing REST API endpoints via encrypted JWT middleware and custom route guards.
- Implemented an end-to-end **RAG pipeline** utilizing ChromaDB vector store and Gemini embeddings with 3-tier intent classification, delivering context-aware peer support responses across 500+ concurrent user queries.
- Engineered real-time anonymous peer communication channels via **WebSockets** and **WebRTC** alongside an automated clinical assessment module for real-time mood risk-level prediction and session scheduling.

Society HomeChef | [MERN](#), [Socket.io](#), [Gemini AI](#), [Concurrency Control](#) ([GitHub](#) · [Demo](#)) Mar 2026

- Architected a multi-role food delivery engine (chef, customer, rider) powered by a custom **Socket.io real-time dispatch system** handling high-frequency concurrent order streams seamlessly.
- Eliminated race conditions and concurrency anomalies using **atomic MongoDB transactions** across parallel order placement flows, guaranteeing absolute data consistency under 50+ simultaneous requests.
- Integrated cryptographic OTP verification for tamper-proof delivery handoffs and Gemini AI-driven nutritional analysis equipped with robust heuristic fallback layers for 99.9% uptime.
