EDUCATION

Madan Mohan Malaviya University of Technology, Gorakhpur

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 8.50

Coursework: Data Structures & Algorithms, Distributed Systems, OOP, DBMS, Operating Systems, Computer Networks

CODING PROFILES

- **LeetCode** – Knight, Max Rating **1979+**, Global Rank **589** in Biweekly Contest 168. [Profile] [Ranking]
- **Codeforces** – Specialist, Max Rating **1419+**, Global Rank **1171** in Round 1054. [Profile] [Ranking]
- **CodeChef** – 3-Star, Max Rating **1700+**, Global Rank **197** in Starters 177. [Profile] [Ranking]

ACHIEVEMENTS

- Qualified **ICPC 2025 Regionals** at Amritapuri & Chennai; **Rank 81** at Chennai and **Rank 284** at Amritapuri among nationwide teams. [Certificate]
- Achieved **Global Rank 1598** in **Meta Hacker Cup 2025** Round 2 among worldwide participants. [Certificate]
- Secured **Global Rank 1670** in **TCS Codevita Season 13** among worldwide participants. [Certificate]

PERSONAL PROJECTS

Society HomeChef [GitHub] [Demo]

Mar 2026

Tools: React.js, Node.js, MongoDB, Socket.io, Gemini API

- Built a **production-grade multi-role food delivery platform** with JWT authentication supporting chefs, customers, and delivery riders on a scalable architecture.
- Designed a **real-time dispatch engine** via Socket.io; applied **atomic MongoDB transactions** to eliminate race conditions and ensure **synchronization under concurrent load** – experience with **distributed systems and concurrency**.
- Implemented **cryptographically hashed OTP verification** for tamper-proof order handoffs and end-to-end data integrity across all user roles.
- Integrated **Gemini API** for AI-driven nutritional analysis with heuristic fallback logic ensuring resilience under third-party failures.

SoulCare [GitHub] [Demo]

Nov 2025

Tools: React.js, Node.js, RAG Pipeline, Supabase, WebSockets

- Architected a **secure AI-powered mental health platform** with real-time anonymous messaging via WebSockets and end-to-end encrypted channels.
- Built a **machine learning-backed RAG pipeline** for context-aware AI responses; iteratively debugged and improved precision through structured testing.
- Resolved **data synchronization latency** across distributed clients using Supabase, optimizing server response times for concurrent users.

QuizCraft [GitHub] [Demo]

Sep 2025

Tools: Node.js, Express.js, React.js, MongoDB

- Developed a **full-stack assessment platform** with dynamic quiz creation and real-time result processing for concurrent multi-user access with minimal latency.
- Engineered **high-throughput RESTful APIs** with schema-enforced MongoDB models ensuring data integrity and low-latency responses under load.
- Implemented **JWT authentication** with retry prevention logic and Zustand state management across creator and participant views.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Socket.io, Tailwind CSS, Zustand

Databases & Storage: MongoDB, MySQL, Supabase, Firebase

Systems & Networking: Distributed Systems, Multi-threading, Synchronization, WebSockets, RESTful APIs

AI & ML: RAG Pipelines, ML Model Integration, AI Integration

Tools: Git, GitHub, Postman, VS Code

Areas of Interest: Competitive Programming, Full-Stack Development, Distributed Systems, Machine Learning

LEADERSHIP EXPERIENCE

MMMUT Resources

Aug 2025 – Present

DSA Head

Gorakhpur

Tools and Technology: C++, DSA, Competitive Programming

- **Directed Resource Distribution** for **2,000+ students**; migrated to an optimized cloud repository, significantly reducing download latency and improving access reliability.
- **Mentored 200+ students** in Data Structures, Algorithms, and Competitive Programming – contributing to measurable improvement in student performance. [Video]
